117 million LinkedIn emails and passwords from a 2012 hack just got posted online

Posted May 18, 2016 by [Sarah Perez \(@sarahintampa\)](#)

A LinkedIn hack from back in 2012 is still causing problems for

www.mtv.com/news/16717/[Scarlett Johansson Speaks Out About Nude Photo Leak - MTV](#)

CELEBRITY

SCARLETT JOHANSSON SPEAKS OUT ABOUT NUDE PHOTO LEAK

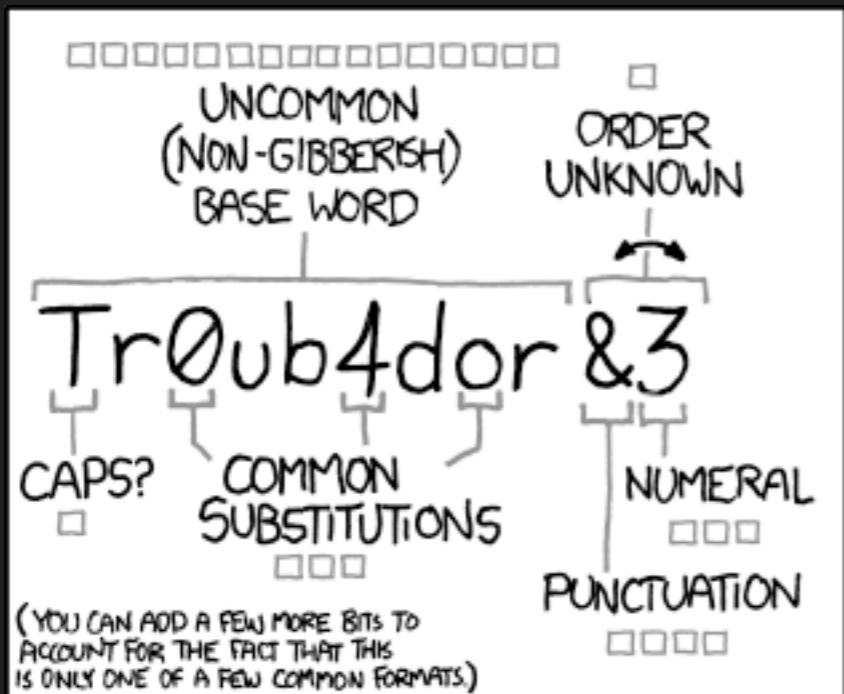

FOR THE FIRST TIME SINCE PRIVATE PHOTOS OF HER HIT THE NET, JOHANSSON TELLS CNN, 'IT JUST FEELS WRONG.'

JAMES MONTGOMERY
09/29/2011

Scarlett Johansson has broken her silence about the [nude photos](#) of her that hit several websites earlier this month, saying that she feels like a target because of her fame.

In an interview with [CNN](#), the actress insisted that celebrities are no different than anyone else when it comes to the right of privacy, but added that, more often than not — as the scandal surrounding her photos proves — that just isn't the case.

"Just because you're an actor or make films or whatever doesn't mean you're not entitled to your own personal privacy," she said.

~28 BITS OF ENTROPY

$2^{28} = 3 \text{ DAYS AT } 1000 \text{ GUESSES/SEC}$

(PLAUSIBLE ATTACK ON A WEAK REMOTE WEB SERVICE. YES, CRACKING A STOLEN HASH IS FASTER, BUT IT'S NOT WHAT THE AVERAGE USER SHOULD WORRY ABOUT.)

DIFFICULTY TO GUESS:
EASY

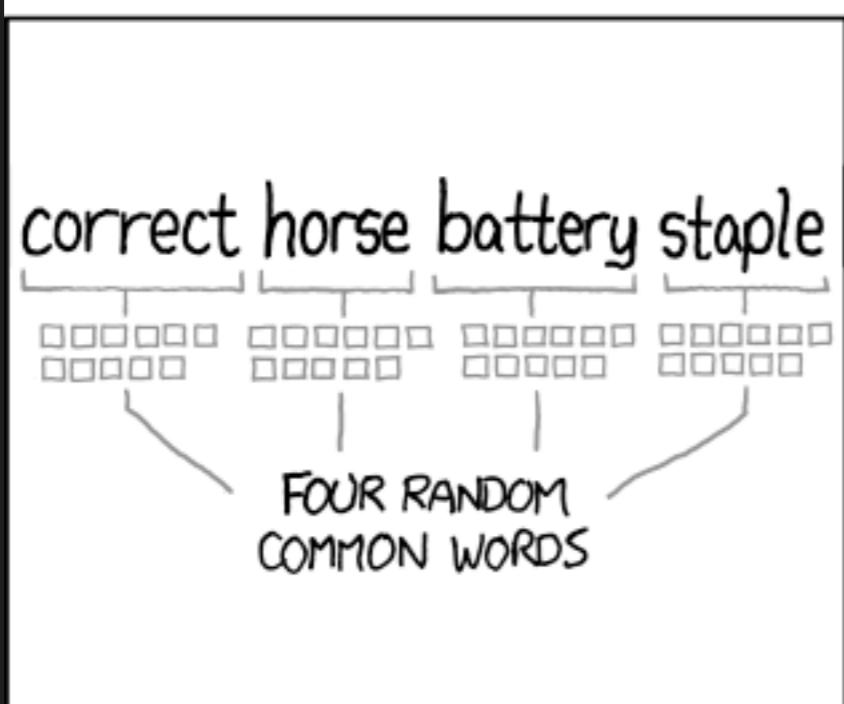

Detailed description: This panel discusses the password 'Tr0ub4dor & 3'. It states there are approximately 28 bits of entropy. It calculates that with 1000 guesses per second, it would take about 3 days to crack. A note mentions a plausible attack on a weak remote web service. The difficulty to guess is labeled as 'EASY'.

WAS IT TROMBONE? NO, TROUBADOR. AND ONE OF THE 0s WAS A ZERO?
AND THERE WAS SOME SYMBOL...

DIFFICULTY TO REMEMBER:
HARD

Detailed description: This panel discusses the password 'Tr0ub4dor & 3' again. It asks if it was 'TROMBONE' or 'TROUBADOR', noting one '0' was actually a '3'. It also mentions a 'symbol'. The difficulty to remember is labeled as 'HARD'.

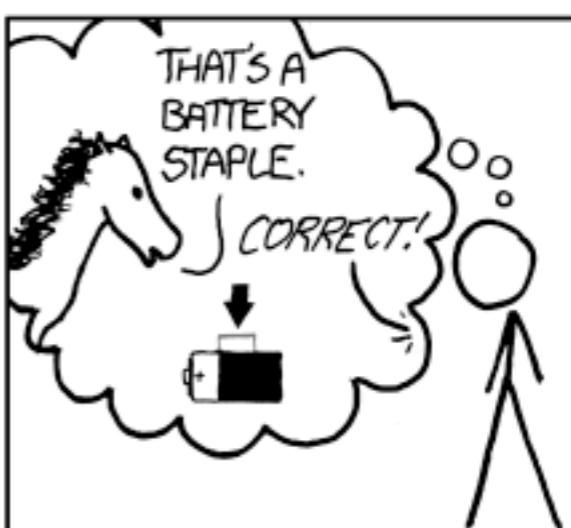

~44 BITS OF ENTROPY

$2^{44} = 550 \text{ YEARS AT } 1000 \text{ GUESSES/SEC}$

DIFFICULTY TO GUESS:
HARD

Detailed description: This panel discusses the password 'correct horse battery staple'. It states there are approximately 44 bits of entropy. It calculates that with 1000 guesses per second, it would take about 550 years to crack. The difficulty to guess is labeled as 'HARD'.

THAT'S A BATTERY STAPLE.
CORRECT!

DIFFICULTY TO REMEMBER:
YOU'VE ALREADY MEMORIZED IT

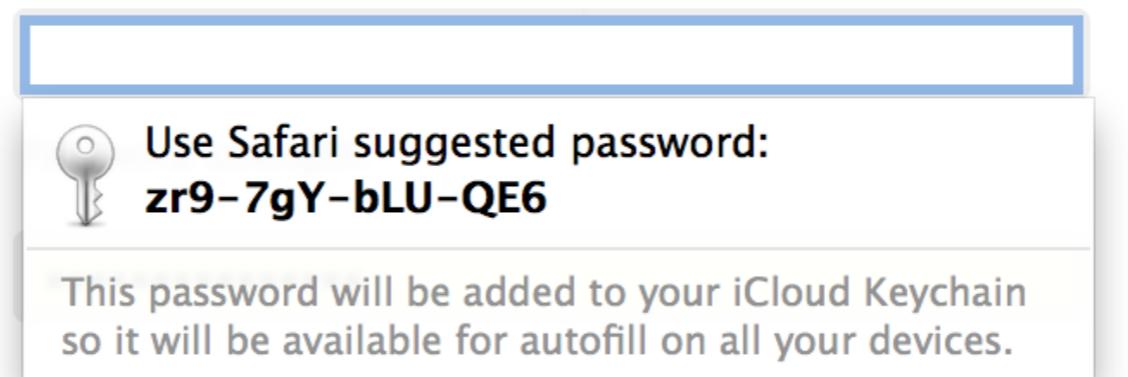

Detailed description: This panel discusses the password 'correct horse battery staple'. It includes a thought bubble where a horse says 'THAT'S A BATTERY STAPLE.' and 'CORRECT!'. The difficulty to remember is labeled as 'YOU'VE ALREADY MEMORIZED IT'.

THROUGH 20 YEARS OF EFFORT, WE'VE SUCCESSFULLY TRAINED EVERYONE TO USE PASSWORDS THAT ARE HARD FOR HUMANS TO REMEMBER, BUT EASY FOR COMPUTERS TO GUESS.

Use senhas longas e únicas!
